REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach an electrochemical deposition apparatus having a silicon wafer anode and a silicon wafer cathode, wherein each were coated with catalytic nanoparticles of iron and nickel, in combination with a power supply imposing a direct current with a potential of approximately 1000 V. The teachings of Weinberg et al are not combinable with the apparatus of Iwasaki et al because the two methods are completely different and one of ordinary skill in the art would have had no expectation of successfully using the power supply of Weinberg et al with the apparatus of Iwasaki et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inventorship

2. In view of the papers filed 3 March 2008, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by the addition of Elvira Vladimirovna Anoshkina as a third inventor.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.
